EXPERIENCE

PNC Bank, Pittsburgh, PA — Data Scientist

May 2022 - PRESENT

Data Scientist on the Customer Experience Analytics team.

Developed Python code to assist analysts in regex text search for phone calls and complaints. Mentored team members on Python and Spark best practices in JupyterHub which enabled them to execute and troubleshoot local environments independently.

Developed and deployed XGboost recommendation models that rank text fields based on their relevancy to the compliance and customer experience teams' needs.

Established data pipelines for complaint and call tokenization to allow other scientists/analysts to more quickly apply machine learning models for their own needs.

Formalized model lifecycle management by introducing Git and establishing the team's first robust version control for large-scale datasets and model artifacts.

UPMC Shadyside, Pittsburgh, PA — Medical Laboratory Scientist

March 2021 - May 2022

Conducted laboratory testing in an urban hospital setting.

Cleveland Clinic, Cleveland, OH — Medical Technologist

June 2017 - August 2020

Conducted laboratory testing in a very fast paced environment for a huge population of patients. Analyzed incident report data and presented results to the Medical Directors of the lab to inform them of the types of errors that happen most often.

EDUCATION

Eastern University, St Davids, PA — Master's Degree

October 2020 - December 2021

Master of Science in Data Science

West Virginia University, Morgantown, WV — Bachelor's Degree

August 2013 - May 2017

Bachelor of Science in Medical Laboratory Science

SKILLS

Python, R, SQL, Git,
Pandas, Spark, Natural
Language Processing,
Topic Modelling,
XGBoost, spaCy, UMAP,
Data Wrangling,
TensorFlow, PyTorch,
Statistical Modeling,
Machine Learning

Data Visualization,
Excel, Tableau, Power BI

JupyterLab, Hadoop,
Hue, Hive, AWS,
BitBucket, Qualtrics

PROJECTS

School: Geospatial Food
Desert Analysis for the
greater Pittsburgh
region incorporating
health data from
multiple sources to
determine how a region
is affected by the lack of
fresh food available.
